An Expert From India Says It Is the Best That Is Made.

The Principal Objections to Them. He Says, Is Their Extravagazt Consumption of Coal and Lack of Durability-They Excel in Hauling

NEW YORK, July 30.—Speaking of the comparative qualities of American-made and other locomotives, Theodore Phillips, a director of the Bengal and Northwestern Railway Company, Limited, and own-er of the Burdwan Engraving Works, of Burdwan, India, who has just arrived here from Liverpool, today, said: "The American-built locomotive is be-

ng received with much favor by the diferent railroad companies in India. There ere two nnanimous objections to them however, and these objections lie in their extravagant consumption of coal, and ick of durability. They are almost con inually in the repair shops. These are two serious deficiencies, it must be adproved thoroughly reliable and eminently

railroad in India."

Mr. Phillips is returning to India from a brief holiday spent with his son-in-law, Sir William Musr, in Warwickshire, England. From here he will go first, by way of San Francisco, direct to Japan, in which country, in the vicinity of Nagasa-ki, he recently purchased 800 acres of and for the purpose of erecting a large engineering plant in connection with his works in ladia. Mr. Phillips had many inresting things to say regarding the ousands of miles of new territory that is been opened up to civilization in the the country some twenty years ago

Their hauling powers, however, are far superior to the English locomotive, and for this reason they are used chiefs afor heavy freight purposes. We have quite a number of American locomotive at present in service on the Bengal and Northwestern Railway and they are highly satisfactory in every way but for

the deficiencies I have mentioned,
"American steel for rails and bridge
purposes is extensively used in India, not because American steel is any better than cheaper, both as regards its bare cost and transportation. Another thing, I may say, that has recently tended to favor Ameripromptness. This, it need hardly be said, is of the greatest importance, for it means an immense saving of what would other naturally gets the biggest share of the steel contracts from india, but in cases where haste is required the order is generally placed in the hands of an American firm."

Commenting on the present strike in this country, Mr. Phillips gave it as his opinion that "America will suffer a great downfall in her future commercial suemacy if she allows organized labor aded by agitators, to get the upper hand. Great Britain long ago permitted trades unionism to grapple her by the throat, and she is suffering now as a consequence a restricted output in every im-portant line of her industries, which has greatly handicapped her in the race with foreign competition and the fulfilling of large orders. In countries where trades unionism is allowed to flourish it never falls to act as a cancer to their commer-

excellent example of her wonderful commercial progress during the past fifty years. And free trade in labor is one of

ysical examination has also to be d. The pay of a civil engineer es from \$2.99 to \$29,000 a year, ac-ng to grade and ability.

CHASES LAST WEEK.

Brady, who, in charge of one of the Naval splendid production at the Grand this Academy steam launches, was in search week and promises, despite the warm of the missing man's body. Fenton was
twenty-eight years of age, and hailed
from Lowell, Mass. He was stationed at
the rifle range across the Severn from the rifle range across the Severn from and that the presentation even excels the Camp Wainwright, where a special detachment of marines is stationed for target practice. Dunn a splendid old Commodore Lyon the actress, and has a delightful special-ty in the first act. All the other parts are capably filled and all add to the general

> ortion work done by La Petite Alma, who is a wonder, and the harmony produced by one of the best male quartettes ever heard at this house. The scenic effects and costumes are new and appropriate. Matinees Thursday and Satur-

Save the Babies.

NFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one quarter, die before they reach one year; thirty-seven per cent., or more than one-third, before they are five, and one half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.
